

## Five Point Lighting

Front of House Lighting (Catwalk) – Front stage lighting that is positioned above the auditorium

Key Light – The brightest or most intense and most focused light used on a subject. The main front light.

Fill Light – A front light. The Fill light fills in the shadows created by the key light. The fill light is not as intense as the Key. The Fill is also softer and is often a cooler color.

Side Light – Used in pairs. Side light shows the audience the subject's form.

Back Light – Soft, flood light positioned behind the subject. Back light gives the subject definition and separates the subject from the background.
